Eight Considerations for Establishing and Promoting a Strong Data Culture

01. Create effective data learning teams
02. Ensure assessment literacy of all team members
03. Get the right data in the hands of the data team
04. Create/Provide appropriate data displays
05. Engage in a cycle of collaborative inquiry
06. Examine multiple data types
07. Embed use of data within the work of the organization
08. Document and communicate widely resulting decisions
